A MEMBER OF  INTERNATIONAL
PARKING INSTITUTE

Enhance your competitive edge with customized parking solutions

MAXPARK Parking System enhances your competitive edge by providing your organization with maximized parking solutions, ensuring profitable returns and long-term protection of your investment, as well as giving your visitors ease and total peace of mind.

Backed by proven technology and Research & Development you can count on, we have become one of the key players in total parking solutions. Therefore, we can customize parking solutions to suit your individual requirements and work with you creatively to deliver total parking solutions to rise above market demands.

Our comprehensive range of services encompasses design, to development and implementation. We also offer post-installation services to meet the exact requirements of your organization. Our dedicated team of software and engineering professionals is highly trained in the application of advanced IT technology to provide your organization with total systems solutions.

Why MAXPARK?

These are the winning advantages that MAXPARK offer to help give your organization the competitive edge.

System Features

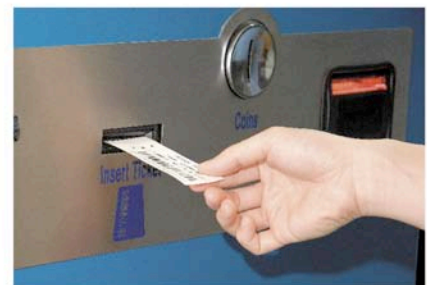

- Efficient Management
- Comprehensive reporting for auditing
- Flexible configuration

System Advantages

- Product reliability
- User-friendly
- Serviceability

Realizable Benefits

- Increased accountability of collection
- Improved productivity
- Enhanced security
- Increased revenue

MAXPARK Computerized Parking System

MAXPARK computerized parking system offers you a wide range of components to meet your organization's budget as well as current and future needs. Our ticket dispensers, ticket verifiers, automatic barriers, payment stations, roadside parking equipment and Central Management System make us the one-stop parking solutions provider.

Pay-Before-Exit System

Visitors pay within the premises at the Autopay or Central-Pay Station before leaving. This fully computerized system means lower labor costs and less dependency on staff. It also reduces fraud and car queues at exit, and makes it safe and convenient for your visitors.

Pay-At-Exit System

As visitors pay at Exit Payment Station, they can receive personalized service and on-the-spot attention.

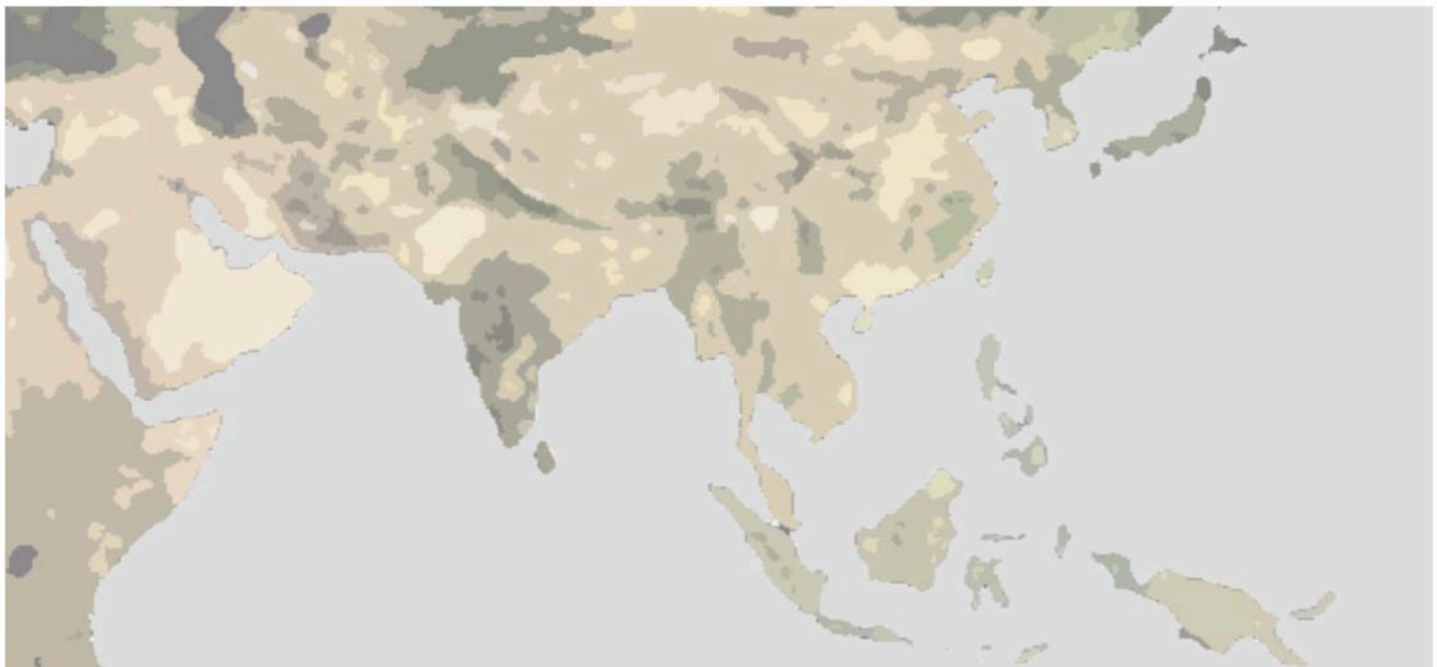

Pay-Per-Entry System

A simple and cost-effective system that spells minimal supervision. The Coin Note Acceptor can be installed at parking entrance to collect flat rate parking fee in advance.

Season Control System

This monthly payment system ensures secured transaction and minimizes the risk of fraudulent acts as its Anti-Passback Control ensures single entry per vehicle at any one time. Upon entry, your visitor has to exit the car park before re-entering.

The Company

Sigma Technology Sdn. Bhd. was incorporated in the 80's to provide customized total solutions in the design, development, supply, installation and maintenance of high technology products encompassing business information, access control, parking, highway and traffic management and specialized dispensing systems. Our core business is in providing Information Technology and Automated Systems Integration for the Transport and Traffic industries.

International Presence and Proven Track Record

Having established a stronghold presence in major cities and towns in Malaysia, Sigma Technology has also established offices in Thailand, Bangladesh and India to cover projects in the ASEAN region.

Our line of products is a result of decades of experience and expertise in the field. Customer confidence and successful business partnerships around the world – from Thailand and Brunei to Indonesia and Bangladesh, as well as Myanmar and Cambodia – bear further testimony to the company's impressive track record.

Professionalism and Uncompromising Quality

Backed by reliable Research & Development, proven technology, and a team of

highly trained IT professionals who pledge total commitment to their field of expertise, you can expect quality products and services that are second to none when you form a business alliance with us.

Strategic Business Partnership

Sigma Technology works with you hand-in-hand through the intelligent and creative application of technology and engineering expertise, and provides your organization with the latest proven systems to maximize your return over investment.
